Subject: Confirmation of Business Input and Beta Testing for RotaDent

Dear Douglas,

I am writing this letter to formally confirm my involvement in the development and testing of your staff scheduling application, RotaDent. I understand that this letter will be used as supporting evidence for your final year university project report.

Over the course of your project, I have been pleased to provide you with business input and domain expertise. We discussed the specific operational needs, shift patterns, and scheduling challenges uniquely faced by a busy dental practice to help guide the software's initial requirements. This was a development of ideas you had when you interned at the practice in the summer of 2025.

Furthermore, I can affirm that my practice participated in a beta trial of the RotaDent system. During this testing phase, we actively used the application to schedule our staff at Arch Dental Surgery. Following this trial, I provided you with direct feedback regarding the system's performance, usability, and overall effectiveness in a real-world clinic environment.

The application shows excellent promise and addresses a genuine need in practice management. I intend to adopt RotaDent for full production use within our practice, provided that the new functionalities we discussed are successfully implemented. Specifically, the introduction of automated email notifications, alongside the other minor enhancements we outlined, would make this a highly valuable and complete tool for our day-to-day operations.

Thank you for your hard work on this project. I wish you the very best of luck with your final report and the successful completion of your degree.

Sincerely,

Dr B. S. Bhatt, BDS (Lond), BSc (Hons), AKC
